SUMMARY

Results-oriented and highly skilled Frontend Engineer with good years of professional experience in crafting intuitive and visually compelling user interfaces. Proficient in translating design concepts into pixel-perfect, responsive web applications that deliver exceptional user experiences. Adept at utilizing modern JavaScript frameworks such as Reactjs and Nextjs, coupled with a strong foundation in HTML and CSS, to build dynamic and interactive user interfaces. Have strong collaboration skills with cross-functional teams, including designers and backend developers, to deliver high-impact solutions that blend aesthetics with functionality.

EXPERIENCE

Frontend Engineer

Xerax Labs May 2022 - December 2022, Lagos

· Collaborated with cross-functional teams to design and develop responsive and visually appealing web applications, ensuring seamless user experiences across various devices and browsers.

· Implemented modern UI framework (React) to create dynamic and interactive user interfaces.

· Contributed to the creation and maintenance of a comprehensive design system, ensuring consistency in UI components, typography, and color schemes across multiple projects.

· Integrated RESTful APIs into front-end applications, enabling seamless data retrieval and updates, and enhancing the overall user experience.

Frontend Engineer

Legacy Access Hub December 2022 - Present, Lagos, Nigeria

· Developed high-performance, user-friendly, optimized applications using various modern technologies, including HTML, CSS, JavaScript, Reactjs, Nextjs.

· Collaborated with UX/UI designers to transform wireframes and mockups into interactive prototypes, iterating through design feedback to achieve user-centered interfaces.

· Implemented accessibility best practices, including semantic HTML markup and ARIA roles, to ensure compliance with WCAG guidelines and create inclusive web experiences for all users.

· Improved page load speeds by 28% and increased user engagement by 19% with optimized caching strategies. · Utilized version control systems (e.g., Git) to manage codebase changes, collaborate with teammates, and maintain a well-documented development history.

· Integrated RESTful APIs into front-end applications, enabling seamless data retrieval and updates, and enhancing the overall user experience.

PROJECTS

Stock Keeper - An app built to help manage your inventory

Legacy Access Hub · June 2023 -August 2023

· Developed the user interface of the stock keeper app using modern frontend technology Reactjs. Created intuitive and user-friendly interfaces that allow users to easily view and manage their stock.

· Developed interactive charts and graphs to visualize stock trends, quantities, and other relevant data using libraries like Chart.js. · Developed authentication and authorization mechanisms to ensure secure access to the app's features based on user roles and permissions. · Implement user profiles and settings to personalize the experience.

Onecoop - A web app built to help optimize cooperative operations efficiently.

Legacy Access Hub · January 2023 - March 2023

· Translate UI/UX designs and wireframes into functional and visually appealing user interfaces using HTML, CSS, and JavaScript framework (Reactjs).

· Ensured that the app's interface is responsive and works well on various devices and screen sizes, providing a consistent user experience. · Collaborate with backend developers and other team members by using version control system (GitHub) to manage code changes and ensure a streamlined development process.

· Optimized performance to ensure a smooth user experience.

SKILLS

HTML/CSS, JavaScript, Reactjs, Nextjs, Redux, Version Control/Git, RESTful APIs, Collaboration and Communication.
